

stylebook guide

the online stylebook is a constantly evolving repository showcasing the fabrics and hardware currently in stock, as well as a collection of design templates that commission clients can reference to help create their perfect garment.

don't think of the design templates as rigid options to choose from, but as building blocks to be used to develop your own unique idea. designs in each category are numbered so that you may reference them when filling out your request form, but feel free to include any changes you'd like made.

furthermore, if your design idea isn't represented by anything in the stylebook, don't worry. I can replicate pretty much anything you like if given a photo reference.
